4. Functions

-  To watch live video (in split screen mode) transmitted from WiFi drone with APP control function.
-  To watch 3D movie.
-  To watch virtual reality game.

Operation Instruction

1. WiFi Control

- ① Turn on the APP (please refer to the drone user manual for APP instruction) and enter the control interface. Click on **VR** to enter split screen mode.

- ② Tear off the protective film of the lens. Open the mobile phone holder and holding it, then open the lower mobile phone holder. Lift up the upper holder and put the mobile phone into the holders slots. Adjust the mobile phone to the best viewing position and then release the upper holder. Lift up the upper holder to take out the mobile phone from the holders.

Tip: ensure the mobile phone screen faces to the lens, and keep the split screen center line and the VR center line overlapping.

③ Adjust the headband.

Adjust the tightness of the three headbands to the most comfortable position.

Tip: The Velcro should be outwards, which is convenient to adjust the headband.

④ Adjust the pupillary distance

If there is double image, move the lens till the image is clear, which also available for short-sighted user.

⑤ Shade cloth

When the lights is too strong to view the video clearly, hitched the VR Glasses by the shade cloth to protect the screen from strong lights.

⑥ To exit from split screen mode

Click on the screen and  icon appears. Click on this icon to exit from split screen mode.

Watching for a long time your eyes may feel uncomfortable. It's recommended to take a rest per 30 minutes.
